## **LifeSafety Power Expands ProWire® with New ASSA ABLOY ACCENTRA™ Digital Unified Systems Integration**

*New partnership unifies power, lock outputs and ASSA ABLOY ACCENTRA controllers for project consistency and labor savings*

**Phoenix, AZ, March 19, 2025** — LifeSafety Power, in partnership with ASSA ABLOY ACCENTRA, continues to build upon its industry-leading innovation and legacy of integrating access control boards and power modules into a single enclosure.

LifeSafety Power announced a new technology alliance with ASSA ABLOY ACCENTRA, expanding its ProWire® solutions to integrate ASSA ABLOY ACCENTRA NTX series controllers. ProWire is LifeSafety Power's premier prewired enclosure – incorporating the latest engineering techniques and features to streamline power installations for professional, standardized results.

ProWire solutions feature pre-terminated wiring harnesses, saving field cabinet wiring time and promoting consistent, easier-to-service installations across campuses or multiple locations. ASSA ABLOY ACCENTRA, Berlin, Conn., provides a complete line of high-performance commercial door hardware and access control solutions.

The new LifeSafety Power ASSA ABLOY ACCENTRA ProWire prewired system allows security integrators to achieve the advantages of prewiring in a single chassis coordinating electrical and mechanical integration. Factory installed and tested pre-terminated wiring harnesses enable plug-and-play connection to the controller board. A removable back plate with color-coded controller wiring connects lock outputs, RS485 communication, faults and tamper switch for fast and accurate field work. The enclosure also includes space for LifeSafety Power NetLink® Network Connectivity modules for intelligent managed power. NetLink technology enables detailed power health reporting, remote troubleshooting and battery testing, email/SNMP alerts and other proactive and predictive data.

The new ASSA ABLOY ACCENTRA ProWire Solution joins the growing list of access control integrated power options and OEM partnerships available from LifeSafety Power. "These industry-leading partnerships are core to our ongoing innovation and ability to support such a large number of access control installations in the industry," said Trevor Maness. "We are pleased to now offer a solution that is compatible with ASSA ABLOY ACCENTRA."

Invented by LifeSafety Power, ProWire systems represent the highest level of integration between a power system and an access control solution. ProWire is an installer's blueprint for consistent, streamlined installations and professional, connected power campuses.

### **About [LifeSafety Power](#)\***

LifeSafety Power is a premier manufacturer of intelligent power management systems for physical security and access control and the chosen standard for many Fortune 500 companies around the world.

LifeSafety Power has created new categories of access control power including intelligent power solutions which increase the reliability of the security infrastructure, while prewired components decrease labor and yield more consistent installations across an enterprise. These innovations have led to LifeSafety Power becoming the power solution of choice for leading access control panel OEMs throughout the security industry.

LifeSafety Power is part of the ASSA ABLOY Group and is headquartered in Phoenix, Arizona. For more information, please visit [LifeSafety Power](#) or call (888) 577-2898.
